App**SPACE**

sepura

Commercial Radio Apps

Sepura has taken the innovative step of introducing AppSPACE, which allows the simple, yet secure, development and deployment of powerful apps on it's SC2 Series TETRA radios, allowing response teams to operate more safely and effectively.

Apps to Improve Safety & Efficiency

Lost Radio Alerter
Never lose your radio again
- Radio emits loud audible alert after separation
- If alert is not cancelled, escalated alert sent to colleague, team leader and/ or control room with time & GPS data
- Reduces equipment costs

Field Reporting
File reports on the go
- Efficiently sends inspection reports to a central database
- Quick and simple data input eliminates paper forms & administration
- For TETRA radios & mobile broadband devices

Telemetry Monitor
Track equipment status
- Sends alerts from equipment including environmental monitors, process equipment, and entry/exit alarms
- TETRA network allows telemetry in remote areas
- Can monitor and control

Team Leader App

Monitor the critical status alerts of individuals in your team & coordinate support to optimise team safety and performance. Available as an AppSPACE Radio App or Broadband / LTE Device App.
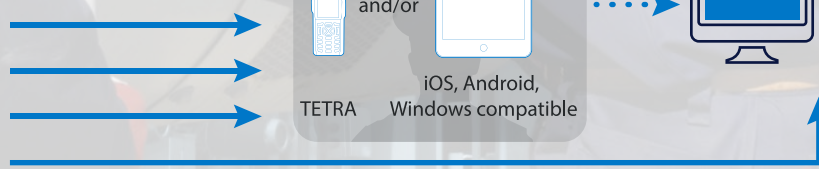

Field force   Team Leader   Control room

TETRA

- Low battery status
- Smart equipment status
- Lost radio status
- Failed call reporter

and/or

TETRA   iOS, Android,
Windows compatible

Apps to Improve Safety & Efficiency

Radio Asset Logger
Simply log radio by user
- Reduces financial and security losses
- Simplifies management of pool radios
- Simple, quick ID entry at radio 'power on'
- Radio sends data to update asset register

Failed Call Reporter
Identify network dead spots
- Automatically record the location of dropped call incidents
- Sends a report detailing the radio ID, signal strength, time stamp and GPS location
- Sends report of a 'near miss' at the press of a button

Sepura Smart Chat
Secure messaging platform
- Securely sends pictures and text messages across TETRA radios and broadband / LTE devices (e.g. smartphones, tablets, laptops and servers)
- Improves safety and efficiency through faster communications
- Connects field forces and control rooms at all stages of TETRA/LTE transition
- For TETRA and broadband devices (e.g. iOS, Android and Windows)

Compatible with:
- TETRA
- iOS
- Windows
- Android

Tailored applications are also available on a project basis to suit your requirements.
