

## Press Release

Cambridge, 9th June 2020

### Mexico City Police Refresh Critical Communications Solution with Sepura TETRA Radios

Police in Mexico City have upgraded their critical communications devices to Sepura SC20 and STP9200 models, equipping their officers with modern, powerful TETRA radios. From December 2020, many of the city's 46,000 officers will benefit from Sepura radios' famed robustness, outstanding audio quality and reliable performance.

A further batch of 3,000 Sepura radios will be provided later in the year to the city police teams, ensuring that significant numbers of officers will benefit from the new devices. The radios will be used on a variety of operations across the city, including general police work, customs checks, border patrols and city security.

TETRA radio*

The decision to invest in Sepura radios followed an extensive period of operational testing involving both technical and operational staff, meaning the radios were analysed from an operational, administrative and business point of view. The tests concluded that the Sepura devices had superior audio quality to match their robust design and flexibility.

Operational testers also praised the excellent battery life of both the STP9200 and the SC20, adding that the smart user interface made the main functions quick and easy to perform.

The final package delivered by Jomtel, Sepura's partner in Mexico, delivered an outstanding package of support and maintenance with options to further expand the solution where required.

Following the successful deployment of the initial batch of radios, Jorge Morera, Commercial Director of Jomtel commented:

"As Sepura Channel Partner, we are delighted to continue to deliver Sepura's advanced TETRA products to Mexico. This is the first TETRA radio solution deployed by Mexico City Police, proof of the continuing demand for the proven TETRA technology. We have no doubt that the Sepura radios will expand the capabilities of the Police teams in their mission critical operations."

Tim Mills, Sales Director for South America at Sepura said:

"There is significant potential in Mexico to continue to develop the TETRA business for municipalities and other police organisations. We look forward to working with Jomtel to assist further forces to implement Sepura TETRA solutions."

**IMAGE:**

Mexico City Police are currently wearing face masks to protect from Covid-19. The loud audio on the Sepura STP9200 is key to ensuring that messages are clearly heard, despite officers wearing additional facial equipment.

**ABOUT SEPURA**

Sepura is a recognised global leader in the development and supply of radio terminals, accessories and applications for TETRA-based mission-critical and business-critical communications. Based in the UK's Cambridge technology hub, Sepura provides local support through its global footprint, and is a trusted partner to public safety users and commercial customers in the professional mobile radio (PMR) market. Sepura's comprehensive solutions for critical communications enable customers to address the demanding operational challenges they face.
